## Community Messengers

[Drop Off Informative Resident Flyers For Community Places To Post]

Since 2009 this nonprofit has not charged a single cent for offering and sharing helpful information with U.S. private home heads. Never will.

All information is free.

As a Community Messenger, volunteers visit locations nearest to where we live which are generally of a community nature i.e., library, center, religious institution, neighborhood association, etc. Basically, volunteers drop by to ask management or other staff with authorization if it would be okay if we posted the flyer in designated area of their premises. Or we can politely ask if they will.

The flyer is about HGRBS’ [“Free Service Policy.”](#)

Through connecting with HGRBS, volunteer neighbors have access its vast resource of information.

It can be helpful towards neighbors making safer and wiser decisions about individuals hired to assist with their home improvement projects. This is part of the HGRBS [Resident Strategic Studies](#) “ format which complement the “Free Service Policy” via a series of crucial tips and online study guides for self-empowerment.

Succinctly, when volunteers like yourself are getting permission to have the flyer posted indoors at reputable community places, you are really helping to make this invaluable home information available for neighbors to access. It could be just what someone needs to know about but did not know how to find. This is the honorable social good you will contribute to as a Community Messenger. Your assistance is as welcome as it is needed. Good Luck!
